

## ELECTRICAL SPECIFICATION

|                                  |   |                        |
|----------------------------------|---|------------------------|
| Part No                          | : | AT-ANT-HORN-WR187-N(F) |
| Frequency Range                  | : | 3.95 to 5.85 GHz       |
| Gain                             | : | 15 dB                  |
| Impedance                        | : | 50 Ohms                |
| Input VSWR                       | : | 1.25:1                 |
| Pattern                          | : | Directional            |
| Polarization                     | : | Linear                 |
| Horizontal Half Power Beam Width | : | 33.3°                  |
| Vertical Half Power Beam Width   | : | 33.8°                  |
| RF Connector                     | : | N Female               |

## MECHANICAL SPECIFICATION

|                              |   |                     |
|------------------------------|---|---------------------|
| Mechanical Dimensions(LxWxH) | : | 90.6x123.9x286.5 mm |
| Waveguide Size               | : | WR-187              |

|                                                                                                     |                                                                                       |                                      |   |   |
